Claims 72-81 remain pending. Applicants election of Group I with traverse is acknowledged, as is the elected specie. Applicants' arguments have been found persuasive, and claim 81 is rejoined with the elected group.

Claim 72 is rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1 of USP 6,444,786 or claim 6 of USP 6,620,781. Although the conflicting claims are not identical, they are not patentably distinct from each other. Instant claim 72 is a narrow subgenus of claim 1 of USP 6,444,786, and a narrow subgenus of claim 6 of USP 6,620,781.

The obviousness-type double patenting rejection is a judicially established doctrine based upon public policy and is primarily intended to prevent prolongation of the patent term by prohibiting claims in a second patent not patentably distinct from claims in a first patent. In re Vogel, 164 USPQ 619 (CCPA 1970). A timely filed terminal disclaimer in compliance with 37 CFR 1.321(b) would overcome an actual or provisional rejection on this ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.78(d)

Claims 72-81 are rejected under 35 U.S.C. §112 second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 72, each of the following (so-called) "variables" can represent only one substituent:

R^{22} , R^{23} , R^{24} , R^{25} . However, a "substituent variable" is a symbol which represents more than one substituent. Each of the cited symbols can represent only one substituent; as such, they are not really variables. It is suggested that in the structural formula, a hydroxyl group be used in place of R^{22} , a hydrogen be used in place of R^{23} , a hydrogen be used in place of R^{24} , an isobutyl group be used in place of R^{25} and that variables "x" and "n" be eliminated.

The US patents that were cited on the IDS have been listed instead on a PTO-892, so that the class/subclass information will be fully legible.
